Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 02 January 2004.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

In response to the amendment filed 1/2/2004, all the amendment to the claims have been entered, and the action follows:

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Art Unit: 2623

3. Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shigematsu (EP 1018695).

The rejection of claims 1-10 are maintained and incorporated with reference as set forth in the prior office action (paper # 3).

4. Claims 11-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shigematsu (EP 1018695) in view of Newton et al (US 6376393).

The rejection of claims 11-17 are maintained and incorporated with reference as set forth in the prior office action (paper # 3).

The rejection of claims 18-51 are maintained and incorporated with reference as set forth in the prior office action (paper # 3).

Response to Arguments

5. Applicant's arguments filed 1/2/2004 have been fully considered but they are not persuasive.

Applicant argues that the reference Shigematsu fails to teach "a substantially direct electrical connection between the sensor element and the memory that holds the resultant sensed output" (see page 12 paragraph 2). Examiner disagrees with the applicant. In the instant application the claims are not claiming the subject matter that is argued. The subject matter "a substantially direct electrical connection between the

sensor element and the memory that holds the resultant sensed output", rather the sensor element is substantially directly coupled to the electrical device and the "the memory that holds the resultant sensed output" is not claimed. The reference does connects the sensor circuit [102] with the memory [103], see figure 14 through a register [105] "substantially directly coupled" as is claimed.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
